Arkansas Division of Workforce Services

The *Arkansas Labor Market* is prepared monthly in conjunction with the U.S. Department of Labor, Bureau of Labor Statistics (BLS). The current month's estimates are preliminary, while previous month's data is subject to revision.

Estimates of nonfarm payroll jobs show the number of jobs by industry and reflect employment by place of work. Hours and earnings estimates are based on payroll and worker-hour data collected for production workers in manufacturing industries.

Industries are classified according to the North American Industry Classification System (NAICS). All estimates are based on a first quarter 2019 benchmark.

### Explanation of Terms and Concepts

#### Monthly Business

##### Survey of Employers

A monthly sample survey designed to provide industry information on nonfarm payroll jobs. Data are compiled each month from mail surveys and telephone interviews conducted by the Bureau of Labor Statistics in cooperation with Department of Workforce Services. The data are based on establishment records and include all workers, full- or part-time, who received pay during the payroll period which includes the 12th of the month. Approximately

## Technical Notes

5,000 Arkansas business establishments are surveyed.

### Metropolitan

#### Statistical Areas

A term applied by the U.S. Office of Management and Budget to counties that have one or more central cities and that meet specified criteria of population density, commuting patterns and social and economic integration.

### Current Population

#### Survey (CPS)

A monthly sample survey of the population 16 years of age and over, designed to provide data on the labor force, the employed and the unemployed. The survey is conducted each month by the Bureau of the Census for BLS. The information is collected by trained interviewers from a sample of about 60,000 households. The data collected are based on the activity reported for the calendar week including the 12th of the month. Approximately 800 Arkansas households are represented in the sample survey.

### Civilian Labor Force

The sum of all employed and unemployed persons 16 years of age or older. Members of the Armed Forces are excluded.

### Employment

An estimate of the number of persons who worked any time

for pay or profit or worked 15 hours or more as unpaid workers in a family business during the calendar week which includes the 12th of the month. Also included are those who, although not working, had some job attachment and were not looking for work, and persons involved in labor management disputes.

### Unemployment

An estimate of the number of persons who did not have a job, but were available for work and actively seeking work during the calendar week which includes the 12th of the month.

### Unemployment

#### Rate

The number of unemployed as a percentage of the civilian labor force. Unemployment rates are calculated from unrounded data.

### Seasonal

#### Adjustment

A statistical technique applied to monthly data to eliminate changes that normally occur during the year due to seasonal events such as weather, major holidays, schedule shifts, harvest times, and the opening/closing of schools.

## MAY SPOTLIGHT Business Employment Dynamics (BED)

Business Employment Dynamics, also known as BED, tracks employment gains and losses at individual business locations. BED statistics are calculated from quarterly reports provided by employers to the Quarterly Census of Employment and Wages (QCEW) Program. Like QCEW data, BED statistics are produced and published on a quarterly basis. At this time, BED data is only available at the national and statewide levels.

The information produced from BED statistics includes gross job gains and losses at establishments with changes in employment. These employment changes occur when establishments open/expand or close/contract. Gross job gains are a combination of jobs created from both openings of new businesses and expansions at existing businesses. Gross job losses are a combination of jobs lost from both existing businesses that close and those that reduce their number of employees. The net change is the difference between gross job gains and gross job losses.

## STATE OF ARKANSAS Civilian Labor Force Summary

Labor force data, produced by the U.S. Department of Labor, Bureau of Labor Statistics and released today by the Arkansas Division of Workforce Services, show Arkansas' seasonally adjusted unemployment rate declined one and three-tenths of a percentage point, from 10.8 percent in April (revised up from the preliminary April estimate of 10.2 percent) to 9.5 percent in May. Arkansas' civilian labor force increased 33,715, a result of 46,378 more employed and 12,663 fewer unemployed Arkansans. The United States' jobless rate decreased from 14.7 percent in April to 13.3 percent in May.

BLS Program Operations Manager Susan Price said, "Due to the partial re-opening of the economy, the number of employed Arkansans rose 46,378 in May. The increase in employment and the decline in unemployment resulted in an unemployment rate drop of over one full percentage point."

Details of the BLS methodology and the impact of COVID-19 on the April and May estimation process can be found [here](#).

## STATE OF ARKANSAS Nonfarm Payroll Job Summary

April 2020 - May 2020

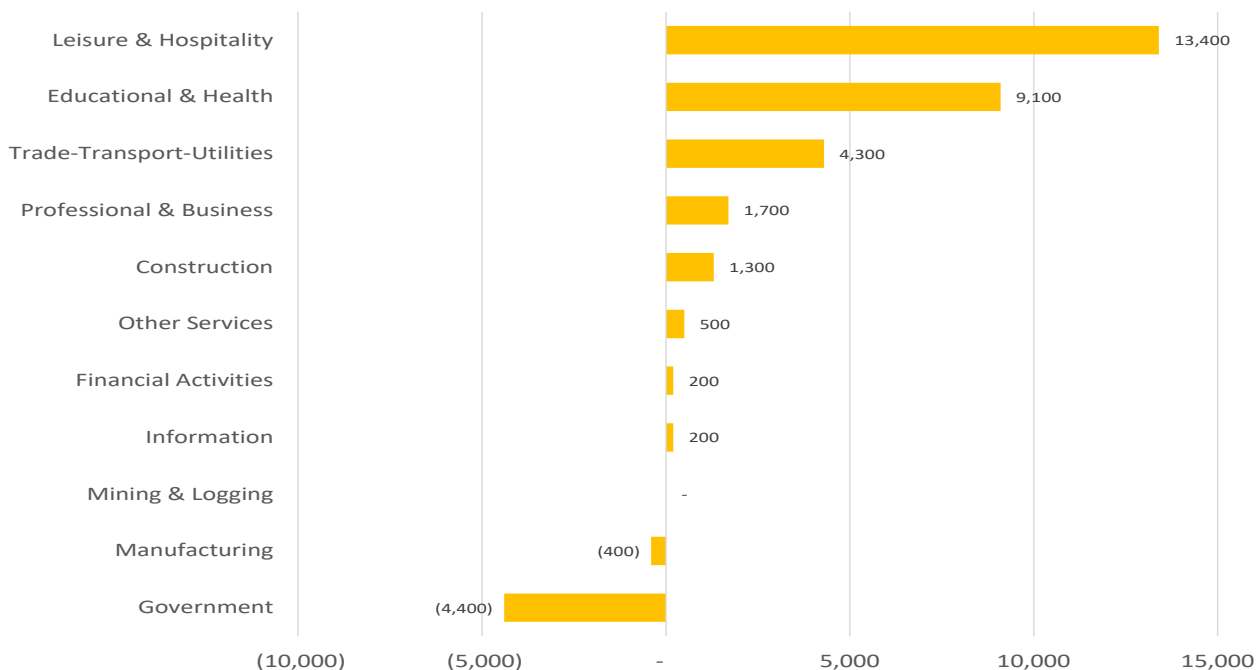

Nonfarm payroll jobs in Arkansas rose 25,900 in May to total 1,191,200. Eight major industry sectors posted job gains, while two sectors declined. **Leisure and hospitality** added 13,400 jobs, related to the partial re-opening of restaurants and recreation centers. Jobs in **educational and health services** increased 9,100. All expansions were in health care and social assistance (+9,200), as non-essential medical offices began to open. **Trade, transportation, and utilities** gained 4,300 jobs, largely in retail trade (+4,600). The greatest loss was in **government**, down 4,400 jobs. Most of the decline was related to educational services in state and local government, due to the official end of the 2019-2020 school year.

May 2019 - May 2020

Compared to May 2019, Arkansas' nonfarm payroll jobs are down 92,800. Ten major industry sectors posted losses, mostly attributed to the COVID-19 response and the related impact on businesses. Jobs in **leisure and hospitality** fell 31,100. Losses were posted in all subsectors, with food services reporting a majority of the contractions (-25,600). Employment in **manufacturing** dropped 18,500. Durable goods reported most of the decrease (-14,600), particularly in transportation equipment manufacturing and fabricated metal product manufacturing. **Government** jobs declined 12,400. All losses were in local (-7,700) and state (-5,200) government, mixed between educational and non-educational jobs. Employment in **educational and health services** is down 9,200. Health care and social assistance posted most of the decrease (-7,400). **Professional and business services** declined 6,600. Most of the contractions were in administrative and support services (-7,300), the subsector which includes employment agencies. Jobs in **trade, transportation, and utilities** dropped 6,100, with losses in retail trade (-7,800) more than offsetting gains in other subsectors.

### County Labor Force Summary

As a result of the partial reopening of Arkansas businesses, unemployment rates declined in 65 Arkansas counties between April and May. Rates in six counties increased, while four counties remained stable over-the-month. Jobless rates ranged from a low of 5.1 percent in Arkansas County to a high of 14.8 percent in Mississippi County.

In May, sixty-nine of Arkansas' 75 counties posted jobless rates at or above seven percent. That is down from 72 counties above seven percent in April. Monthly unemployment rate changes ranged from a decline of 4 percentage points in Cleburne County to a one and eight-tenths of a percentage point increase in Franklin County.

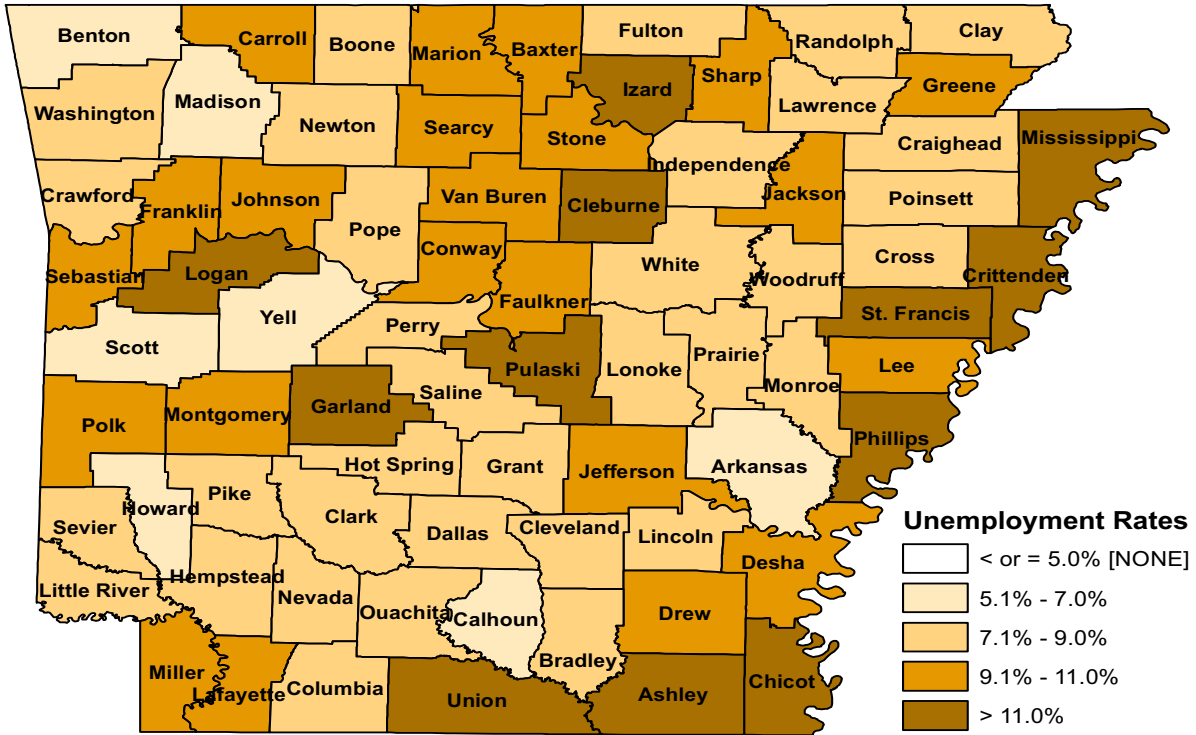

Compared to May 2019, jobless rates are up in all 75 Arkansas counties. Over-the-year gains ranged from as low as a two and one-tenth of a percentage point increase in Sevier County to as high as a ten and two-tenths of a percentage point rise in Garland and Mississippi counties.
